

# ATOMIC

## GHERKIN | SPINED

Predominantly female flowering hybrid. This early and vigorous variety produces spined fruits with a pale colour. The fruits have a very small seed cavity. Recommended for industry and fresh market, mainly for Poland. Suitable for long term storage after salting. L/D ratio: 3,1-1. Good ratio for small and also bigger fruits.

Type crop: Predom. female flowering

Resistance HR: Cca / Ccu

Resistance IR: CMV / CVYV / Px

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advice.
