

## LAGOS CUCUMBER

Parthenocarpic hybrid in American-slicer type. The earliest hybrid in market. Dark green, slightly spined fruits, 20-22 cm long. High yielding, with good tolerance to flower abortion. Open growth enables easier harvest and decreases diseases pressure.

Type Crop INT : Parthenocarpic

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
