

## TAMARINDO

WHITE CABBAGE

Productive type suitable for tropical conditions. It produces flatround heads with a good internal structure, It has smooth leaves with a green colour. It can be used for coolwrap purposes because of the thin leaves.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
