

TROPIX SHALLOT

Tropical light red shallot variety for short day areas. Produces globe shaped bulbs. The thin leaves are upright and light green. Most productive under dry conditions. Can be stored for a short term.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via www.bejo.com/countries. Our local crop specialists are happy to give additional tailor-made advise.
