

## RED CORAL

### ONION

Mid early onion for semi long day areas. Produces jumbo's with an attractive pink colour. Red Coral has a very good root system and so suitable for dry areas.

Type Crop INT :

Storage, pink

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
