

## TOTANA ONION

An early Spanish intermediate type. It is productive and despite its earliness, it produces firm bulbs. Suitable for east european markets.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
