

## SAMBA CELERY

Plato type with tall, very dark petioles. Compact and high yielding, with some strength against bolting. Uniform.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
