

JIVE CELERY

Good tasting variety, upright growth, suitable for sticks. A bolt tolerant variety which is suitable for spring, summer and autumn cropping. Tall smooth apple green petioles with small spoons. Has a juicy crunchy texture without string. A very versatile variety suitable for market, sticks or hearts production.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via www.bejo.com/countries. Our local crop specialists are happy to give additional tailor-made advise.
