

BERGEN

CARROT

Bulky Berlicum type. Widely planted at higher density and used as a slicing carrot, but can be planted at lower densities for larger fresh-market carrots, or jumbos. Good feil holding ability. Excellent storage, good flavor!

Growing Days Sowing INT : 150

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via www.bejo.com/countries. Our local crop specialists are happy to give additional tailor-made advise.
