

CORDOBA CARROT

High yielding Chantenay type with strong and healthy foliage. Excellent bolting tolerance and grows well under warm, as well under cooler circumstances.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via www.bejo.com/countries. Our local crop specialists are happy to give additional tailor-made advise.
