

## NORWICH CARROT

Standard variety with upright foliage. It is very versatile and reliable with bulky, strong and attractive roots. Approximately 104 days from sowing to maturity.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
