

NAPOLI

CARROT

For bunching or partly with leaves. No cracking, excellent colour. Possible to grow in plastic tunnels as well. An early versatile variety, which can be sown from very early until late for a wide production period. Strong healthy tops, with a good root to top ratio.

Growing Days Sowing INT : 90

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via www.bejo.com/countries. Our local crop specialists are happy to give additional tailor-made advice.
