

ATTIS

BRUSSELS SPROUTS

Early variety with a good bolting tolerance. The sprouts are very smooth and dark green coloured. The elongated smooth shape makes this variety extremely suitable for mechanical trimming. An early variety with good vigour and excellent button colour.

Growing Days Planting INT : 155

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via www.bejo.com/countries. Our local crop specialists are happy to give additional tailor-made advice.
