

## FLAMENCO CAULIFLOWER

Early variety with high yield. For fresh market. A vigorous variety with erect leaves and a good curd protection. Not susceptible to riceyness.

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advise.
