

## AVION GHERKIN

Spined parthenocarpic gherkin type for indoor growing. Suitable for very early spring production and summer as well. Good plant growth and fruit setting under lower light intensity and shorter days conditions. Good resistance for high temperature and stressful conditions. Vigorous plants with strong root system. High potential yield. Nice dark green fruits with a good shelf life. Good visible spine in hot conditions.

Type Crop INT : Parthenocarpic

Varieties perform differently under different climatic conditions, and are usually only suitable for specific markets. For more elaborate information about this variety in a specific market, visit the assortments on our country websites, via [www.bejo.com/countries](http://www.bejo.com/countries). Our local crop specialists are happy to give additional tailor-made advice.
