

TORCIDA

TOMATO

An indeterminate tomato for spring cultivations up to 10 clusters. An excellent compact plant type with good plant vigour and leaf cover. The round fruits are around 200-240 grams, have an excellent uniformity with good firmness and a nice red colour.

Type crop:	Indeterminated
Resistance HR:	Fol:0 / Fol:1 / Pf:A,B,C,D,E / ToMV / Va:0
